Tregren

Is a trademark of
3Gren Oy.

HERBIE

Is a hydroponic
technology-based
indoor garden.

IMPORTANT! Due to the continuous development of our products, we reserve the right to change our products without notice.

Read these instructions carefully before use. Incorrect use of this appliance can cause personal injury. Use the device only for its intended purpose.
The manufacturer is not responsible for the improper use or handling of the product or any resulting damage. If in doubt, please contact your retailer or Tregren's customer service by e-mail: info@tregren.com.

The product is intended for domestic use only. The device can be connected to an electrical outlet with a voltage of 100-240V and a frequency of 50/60Hz. The operating temperature ranges from 0°C to 35°C.

Always disconnect the unit from the mains when it is not in use and before servicing or cleaning the unit. Do not use the product in a humid environment. Do not touch the appliance, cord or plug with wet or damp hands.

Do not run the pump dry. Do not under any circumstances alter the device, cord or plug. If the plug does not fit into your outlet, ask an expert to make the necessary modifications.

Do not expose the device to direct sunlight, high temperatures, humid- or corrosive substances.

This device is not intended for children or any other individuals with reduced physical, sensory or mental capabilities or for persons with the lack of experience or knowledge that prevents them from using the appliance safely, unless the person responsible for their safety monitors them or have taught them the use of the device.

Make sure that the power cords are not in anyone's way. Regularly check the condition of the electrical parts. Damaged electrical appliances can cause mortal injuries.

This manual can also be downloaded from tregren.com/support.

ACTIVE GROWING TECHNOLOGY™
ensures that you get stable and high yields with minimal effort.

Herbie is great for the continued growth of herbs bought from any grocery store.

In your Herbie you can grow herbs, flowers, fruits and vegetables.

6
Herbie can fit up to six pots simultaneously. Pots can be up to 11cm in diameter.

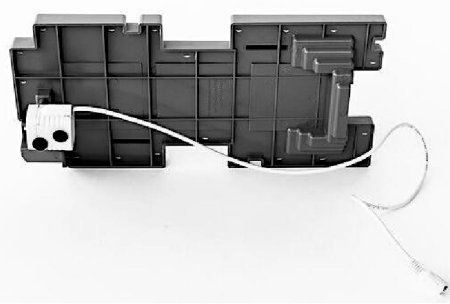

By using Tregren's nutrients, you get the best growth and taste from your herbs.

Tregren's Seed Pods are an ecological and easy approach to growing your own herbs from seeds.

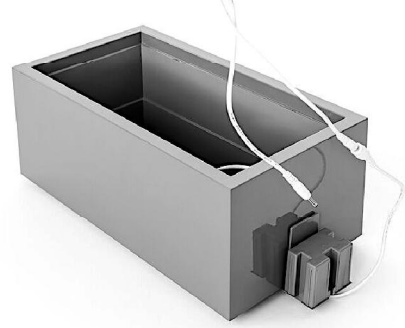

Change the water and nutrients every three weeks.

Check the water level regularly. Preferably every 2-5 days.

ASSEMBLY

Remove the Herbie from the packaging. Rinse the water container and the plant level with water.

1. Make sure that the pump is attached to the floor pin and that the pump control switch is in the centre position.
2. Plug the pump cord to the adapter.
3. Thread the lamp cord through the lamp arm.
4. Attach the shade to the lamp arm.
5. Plug the lamp cord to the adapter.
6. Lower the lamp arm into place.

OPTIONAL: Hide one or both of the cord connectors inside the lamp arm.

If you choose to hide both connectors, make sure that the cords are in separate grooves and that the

lamp arm attaches to the attachment block smoothly.

If you leave both connectors on the outside of the lamp arm, place the lamp's cord in the middle groove.

- Fill the water container with water so that the water surface is at the MAX WATER line. (Approx. 2 liters.)
- Place the product in a location where the temperature is as constant as possible. Do not place the unit in a draughty or parching location.
- Insert the plug into the socket and the Herbie is operational. Be sure to check that the plug is completely dry.

If the water does not circulate, check that the pump is attached to the plant level and that the pump control switch is in the middle position.

GROWING AND HARVESTING

Herbie is well suited for both seed growing and the continued growth of commercial herbs and lettuces.

- **Seed growing** – Tregren's Seed Pod is an easy and ecological way to grow your own herbs and salads. You can also use other growing media such as rock wool, coconut or plastic foam. If you use mulch or peat, always put it in a pot.
- **Commercial herb pots** – Remove the plastic cover from the salad or herb pot and place the pot onto the plant level. Depending on the plant, it can produce harvest from a few months up to a couple of years.
- **Harvesting** – The best way to harvest a salad is by collecting the outermost leaves of the seedling. This way, the growth will accelerate and the plants will get a higher yield. The best way to harvest herbs is to cut off the stem right above the leaf couple and two new leaf tops will grow in its place.

CHANGING THE WATER

1. Take out the plug from the socket and remove the lamp arm. Pour out the water, rinse and clean the water container. Check the pump. If necessary, clean it by removing and rinsing the grating and propeller.

2. Fill the water container with fresh water and add the new nutrients. **NOTE!** Regularly check that the water level is between the MIN and MAX levels.

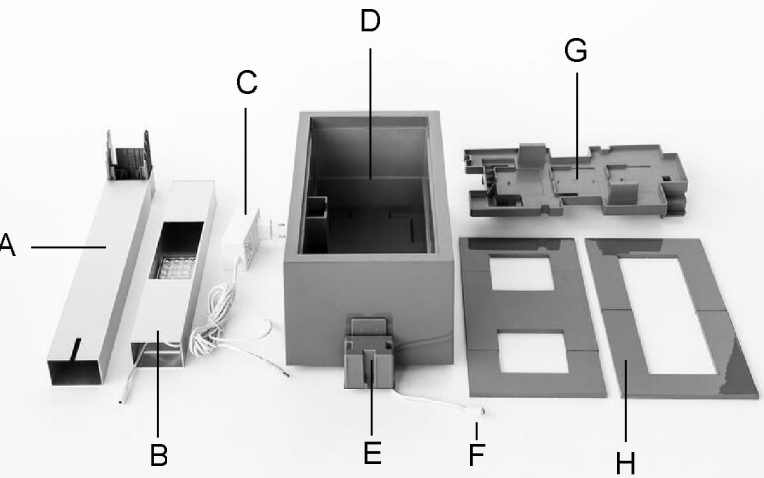

3. Attach the lamp arm. Insert the plug into the outlet and the Herbie is ready for use. **NOTE!** Be sure to check that the plug and connectors are completely dry.

From our online store store.tregren.com you can purchase supplements, accessories and spare parts such as:

- Seed pods
- Nutrients
- Pumps
- Growing media
- Lamp arms in different heights
